

# **My resolution as a Teacher of English Learners**

TC 145 Hailey

The best way to learn English is to use it as much as possible by enjoying itself. Most children have no specific purposes to study. They enjoy having a time with their friends and teachers in school. I decided taking this TESOL for Children course to learn more helpful teaching method for children. I would like to learn a teaching method which is specialized for children. Because children have short learning concentration rather than adults, I think activities are keys to the successful learning to children. Especially games and songs are one of the efficient tools that help children learn English by naturally leading them to get fully involved in the class. I wish I could be a facilitator who helps children enjoy learning English by using these activities.

Current education system in Korea is based on public education but most people depend on private education. These days many private institutes said they are not only following American school curriculum but also using textbook which is learned by American or foreign students in foreign country. But I think this is the privilege not for all of students in Korea but for only restricted children. Education system should be changed in public because all students have the equal right to an education in various environments. Also it is needed a teaching method that takes the Korean student's differences as individuals into account.

Teachers have a strong influence on students. They impart knowledge to students and affect their way of thinking on behalf of their parents in education field.

By taking this course of TESOL for Children, I expect to learn how to assist children to acquire a good knowledge of English as their own language. I believe it is

hard to forget what is learned in the cradle. All children should be encouraged to realize their full potential. This is the reason I want to teach children. I hope my children think and speak like a native speaker of English and enjoy communicating with other people in English. I will be a creative facilitator to help students to learn English more easily and with more fun.
